

Skill Development Course on  
**"ENVIRONMENTAL SUSTAINABILITY FOR THE MSMEs IN THE  
CHEMICAL SECTOR"**

on 28th & 29th May 2026 at Mahad, Maharashtra

---

Dear Sir / Madam,

Greetings from Suschem Welfare Foundation!

We are happy to inform you that Suschem Welfare Foundation, a Section 8 company formed under the Companies Act, 2013, is dedicated to achieve key objectives, including setting up and promoting educational and vocational institutions, ensuring the safe and sustainable handling of chemicals with regard to human health and the environment, supporting vocational education and skill development, contributing to incubators, and fostering research and development across various sectors.

In light of this, we are pleased to inform you that **Suschem Welfare Foundation** is conducting Skill Development Course on:

**"Environmental Sustainability for the MSMEs in the Chemical Sector"**

on

**28th and 29th May 2026**

at

**Mahad, Maharashtra**

This course is supported by **Indian Chemical Council**, an apex national body representing 235 Billion USD Chemical & Petrochemical Industry in India.

The key objectives of this course are to:

- Understand India's regulatory landscape, as it is becoming more stringent, with enhanced monitoring mechanisms, digital compliance systems, increased judicial interventions and stricter enforcement by regulatory authorities.
- Many MSMEs face challenges in keeping pace with evolving environmental expectations due to a lack of trained and informed manpower. Recognising this need, Suschem Welfare Foundation has conceptualised this Skill Development Course as part of its CSR commitment to support chemical MSMEs.
- The programme simplifies regulatory requirements and sustainability concepts into practical, shop-floor level understanding, making compliance and environmental responsibility easier to adopt.
- It aims to strengthen MSMEs' environmental capabilities by enhancing awareness, improving compliance readiness, and encouraging preventive practices rather than reactive action.

## **WHO SHOULD PARTICIPATE:**

Professionals involved in chemical manufacturing including plant heads and those responsible for environment, safety, and compliance are encouraged to participate. The programme is applicable to all chemical and allied manufacturing units, with a special focus on MSMEs. By participating in this workshop, you will gain critical insights into how environmental sustainability can be integrated into day-to-day operations within the chemical industry.

We kindly request you to participate / depute delegates and confirm participation at [suschem@iccmil.in](mailto:suschem@iccmil.in) / [iccmumbai@iccmil.in](mailto:iccmumbai@iccmil.in) as per format below:
