Training Programme on
"SAFETY AND ENVIRONMENT FOR CHEMICAL INDUSTRY"
on 29 and 30 January 2026 at Vashi, Navi Mumbai

Dear Sir / Madam,

Greetings from Indian Chemical Council (ICC)!

You may be aware that the Indian Chemical Council (ICC) is the apex national body representing Chemical and Petrochemical Industry in India. Established in 1938, ICC represents around 500 large and medium chemical manufacturers, accounting for more than 80% of India's chemical and petrochemical production. ICC is the only Indian member of the International Council of Chemical Associations (ICCA).

The chemical industry involves the handling and processing of hazardous substances and is therefore exposed to significant risks such as fires, explosions, toxic releases, occupational health hazards, and environmental impacts. Adoption of robust safety management systems and environmental best practices is essential to ensure regulatory compliance, business continuity, and sustainable industrial growth.

With the objective of strengthening safety culture and enhancing environmental compliance across the chemical industry. ICC has been actively engaged in initiatives under the guidance of the Department of Chemicals & Petrochemicals, Ministry of Chemicals & Fertilizers, Government of India.

To meet the challenges of Safety & Environment in the chemical industry, the Indian Chemical Council (ICC) in association with the Institute of Chemical Technology (ICT), Mumbai under the guidance of the Department of Chemicals and Petrochemicals, Ministry of Chemicals and Fertilizers, Government of India has curated Training Modules on Safety and Environment in Chemical Industry.

Following the overwhelming response and success of our previous eight ICC-ICT Safety & Environment Management Courses, we are pleased to inform you that Indian Chemical Council (ICC) is organizing Ninth Two-day Physical Training Programme on "Safety and Environment for Chemical Industry" on 29 & 30 January 2026 at Vashi, Navi Mumbai.

TOPICS COVERED:

- Process Safety
- Storage, Handling and Transportation of Hazardous Substances
- Fire Prevention & Protection, Emergency Preparedness and Evacuation Planning
- Work Permit System
- Legal Requirements in Safety
- Principles Basis of NGT Orders &
- Community's License to Operate
- Legal Provisions for Environmental
- Management & Concept of EPR
- Waste Management & Effluent Treatment and Discharge Practices
- Principles of 5R & Environmental
- Management as a Tool for Growth
- Safety Data Sheets, Physical, Psychological Health Hazard and its Control
- BBS & Near Miss Reporting, Personal Protective Equipment, Working Equipment and Working around Machinery

The 2-day Program will be a certificate program which will be jointly certified by Indian Chemical Council (ICC) and Institute of Chemical Technology (ICT).

Kindly note that there are no delegate fees, but only limited number of registrations will be considered on a first-come, first-served basis, and prior registration is a pre-requisite.

Please send your registration / nomination, in the link given below:
